

With this book, we want to contribute to the material for the identification of charophyte species, often quite correctly considered difficult to distinguish.

This book concentrates on charophytes that can be found in Poland, but it should also be helpful for people from other countries where charophytes can be found.

- More than 300 photographs
- Detailed description of morphological features of the species
- New and actual syntaxonomical checklist of charophyte vegetation

Jacek Urbaniak & Maciej Gąbka In Spring 2014
