Paweł¹, Pęczuła Wojciech³, Poniewozik Małgorzata⁶, Rakowska Barbara⁷, Richter Dorota⁸, Rybak Andrzej¹, Szczepocka Ewelina⁷, Szczurowska Agnieszka³ and Wołowski Konrad⁹

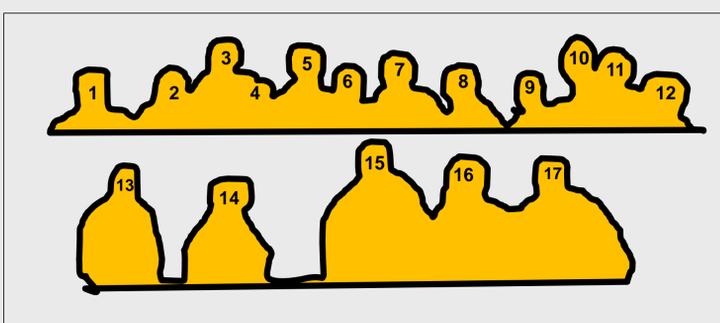

The presentation of the algal flora of aquatic ecosystems on the Bornholm island could not be carried out if not a cooperation of the Polish Phycological Society, Wolinski National Park and NaturBornholm Museum.

The richness of material collected on the Bornholm island is related to the more than 230 characteristics of algae taxa representing 6 various water ecosystems. They include freshwater, halophyte, peat and psammophyte ecosystems. Preliminary we chose an unique habitat in Europe of pro- and eucaryotic organisms of the Bornholm island living in the freshwater and brackish environment of Klintebakken, Hellig Kvinde, Hammershus, Molledeam, Bastemose, Olene and Dueodde.

Location of research sites on the Bornholm island (1-6)

- ¹Adam Mickiewicz University, Poznań
- ²West Pomeranian University of Technology, Szczecin
- ³University of Life Sciences, Lublin
- ⁴University of Mikołaj Kopernik, Toruń
- ⁵Warmian Masurian University, Olsztyn
- ⁶The John Paul II Catholic University of Lublin
- ⁷University of Łódź
- ⁸University of Environmental and Life Sciences, Wrocław
- ⁹Institute of Botany, Polish Academy of Sciences, Kraków

- 1 – Ewa Dembowska
- 2 – Dorota Richter
- 3 – Wojciech Pęczuła
- 4 – Hanna Piórska
- 5 – Fin Jansen
- 6 – Małgorzata Poniewozik
- 7 – Wojciech Kowalski
- 8 – Lubomira Burchardt
- 9 – Barbara Rakowska
- 10 – Maciej Gąbka
- 11 – Krzysztof Czernaś
- 12 – Marta Luścińska
- 13 – Agnieszka Szczurowska
- 14 – Beata Messyasz
- 15 – Andrzej Rybak
- 16 – Bożena Jaworska
- 17 – Paweł Owianny
