

Euglenoids Global Diversity Project

with support by Faculty of Science, University of South Bohemia
and Institute of Botany of the Czech Academy of Sciences

organize five-days course focused on determination of freshwater representatives of photosynthetic and colourless euglenoids especially from the European region together with common ubiquitous species. The course will consist of theoretical lectures focused on modern taxonomy based on molecular-morphological data (polyphasic approach) together with ecological and biomonitoring connotations, theory will be complemented by practical microscopic sessions. It is possible for the participants to bring their own samples or microphotographs of the species for identification. The course will contain a one-day excursion with sampling.

DETERMINATION COURSE OF EUGLENOIDS

Photosynthetic euglenoids | Taxonomy | Colourless euglenoids | Ecology | Lectures

20TH - 24TH JULY 2020

Faculty of Science | University of South Bohemia | České Budějovice, Czech Republic

- Lectures and microscopy sessions will be held in a modern equipped laboratory.
- Maximum of participants is limited to **20 persons**.
- Course language is **English**.
- Fees:
 - **Early payment** (registration before 15th May 2020) - students 6000 CZK, researchers and others 10000 CZK;
 - **Standard payment** (registration before 30th June 2020) - students 10000 CZK, researchers and others 13000 CZK;
 - Fee includes course materials, coffee breaks, social events (welcome and farewell party) and excursion.
- Contact to the organizers egdproject19_at_gmail.com
